

Vox Stellarum:
OR, A LOYAL ⁴⁵⁶
ALMANACK
For the Year of HUMAN REDEMPTION,
1726
MDCCLXXVII.
BEING ³

The First after BISSEXTILE or LEAP-YEAR
In which are contained

All Things fitting for such a WORK; as,
A TABLE of Terms and their Returns;
The Full, Changes, and Quarters of the MOON;
The Rising, Southing, and Setting of the SEVEN STARS,
and other Fixed Stars of Note; the MOON'S Age, and

A TIDE TABLE fitted to the same
The Rising and Setting of the Sun; the Rising, Southing,
and Setting of the Moon; Mutual Aspects, Monthly Ob-
servations; and many other Things, useful and profitable.

Unto which are added,

Astrological Observations on the Four Quarters of the Year

An **HIEROGLYPHIC**, alluding to these present Times;

A remarkable Chronology; the Eclipses;

And other Matters, both curious and profitable.

With a particular Judgement of a visible Lunar Eclipse
and many other Things relating to Astrology.

By **FRANCIS MOORE**, Physician.

L O N D O N:

Printed for the Company of STATIONERS, 1777.

And Sold by **GEORGE HAWKINS**, at their Hall
Ludgate-Street. [Price Eight Pence, stitched]

R. G. H. H. H. H. H.

A plain and easy TABLE, shewing the Time of HIGH-WATER at all these Places under-named.

Note, That the Moon's Age being taken notice of in the TABLE, you have the Time of HIGH WATER at all the under-named Places.									
Queerborough, Portsmouth, Southampton, Kentish Knook, Leith, Boscby, Isle of Wight, Dunkirk, Caudado, Coast of Flanders, at the Sots and Dover Pier. 	900	3	15	0	7	10	0	11	5	0	22	10	0	3	15	0	45	0	0
	1000	4	3	4	8	6	8	12	10	0	25	0	0	3	10	0	50	0	0

If you would know the Interest of one Hundred Pounds for one Month, two Months, three Months, six Months, nine Months, or one Year, look for 100l. in the Side; and in the next Column, under 1 Month, is 8s. 4d.; for 2 Months 16s. 8d.; for 3 Months 21. 5s.; for 6 Months 42. 10s.; for 9 Months 61. 15s.; and for a Year 81. and so of the rest.

This is the honest Way by which Men should
To Interest let their Silver and their Gold;
Yet worldly Misers, when to R. king fall,
They with their Interest get the Devil and all.

A DIALOGUE upon the DEBATES of these troublesome Times, between HERACLITUS and DEMOCRITUS, the Weeping and the Laughing Philosophers.

HERACLITUS.

ALAS! thou laugh'st, perhaps, not feeling well
The painful torments of this mortal hell;
Ah! canst thou (tearless) in this iron age
See men massacred, monsters born to rage.

DEMOCRITUS.

Ha! but why weep'st thou; wherefore in this sort
Dost thou lament amidst this merry sport:
Ha! canst thou chuse but laugh, to see the state
Of men's new follies, and the freaks of fate.

HERACLITUS.

He hath no heart that melts not all in tears,
To see the treasons, murders, massacres;
Sacks, sacrileges, losses, and alarms,
Of those that perish by their proper arms.

DEMOCRITUS.

Who, all dismay'd, swooneth suddenly
To hear or see some feigned tragedy,
(Held in these days on every stage as common)
Is but a heartless man, or but a woman.

HERACLITUS.

O! would to God, our country's tragick-ruth
Were but a fable, no effected truth!
My soul then should not sigh to anger heav'n,
Nor for her plagues my tender heart be riv'n.

DEMOCRITUS.

I take the world to be but as a stage,
Where net-maskt men do play their perforage;
'Tis but a mummary, and a pleasant show,
Sith over all strange vanities do flow.

HERACLITUS.

Those vanities I have in detestation,
As cursed causes of God's indignation,
Which makes me always weep, since on the earth
I see no object for the meanest mirth.

DEMOCRITUS.

Thus from one subject sundry sequels spring,
As diversly our wits deceive a thing.
I laugh to see thee weep; thou weep'st to see
Me laugh so much, which more afflicteth thee.

HERACLITUS.

Laugh while thou list at mortal miseries;
I cannot chuse but e'en weep out mine eyes,
Finding more cause for tears in bloody slaughter,
Than for thy senseless ill-beseeming laughter.

DEMOCRITUS.

Melt thee, distil thee, turn to wax or snow;
Make sad thy gesture, tune thy voice to woe;
I cannot weep, except sometimes it hap,
Through laughing much mine eyes let fall a drop.

HERACLITUS.

I weep to see thus every thing confused;
Order disorder'd, and the laws abused;
Justice revert'd, and policy perverted;
And this sick state near utterly subverted.

DEMOCRITUS.

I laugh to see how fortune (like a ball)
Plays with the Globe of this inconstant All;
How she degradeth these, and graceth those;
How whom she lifts up, down again she throws.

HERACLITUS.

I rain down rivers when against their King;
Cities rebel through subjects bandying;
When Colleges (thro' arms) are rest of art;
When every County kingdoms it apart.

(To be continued in my next.)

A TABLE of Terms and Returns for the Year 1777.

Hilary Term begins Jan. 29, ends Feb. 12.

Returns or Effoign Days.	Exc.	Ret.	Ap.	W. D.
In eight Days of St. Hilary Jan. 20	21	22	23	Thursday
From the Day of St. Hilary in 15 Days 27	28	29	30	Thursday
On the Morrow of the Purif. of Bl. V. M. Feb. 3	4	5	6	Thursday
In eight Days of the Purif. of the Bl. V. M. 9	10	11	12	Wednesday.

Easter Term begins April 16, ends May 12.

From the Day of Easter in 15 Days April 13	14	15	16	Wednesday.
From the Day of Easter in 3 Weeks 20	21	22	23	Wednesday.
From the Day of Easter in 1 Month 27	28	29	30	Wednesday.
From the Day of Easter in 5 Weeks May 4	5	6	7	Wednesday.
On the Morrow of the Ascension 9	10	11	12	Monday

Trinity Term begins May 30, ends June 12.

On the Morrow of the Holy Trinity May 26	27	28	30	Friday
In eight Days of the Holy Trinity June 1	2	3	4	Wednesday.
From the Day of the Holy Trinity in 15 Days 8	9	10	11	Wednesday.
From the Day of the H. Tr. in 3 Weeks 15	16	17	18	Wednesday.

Michaelmas Term begins Nov. 6, ends Nov. 18.

On the Morrow of All Souls Nov. 3	4	5	6	Thursday
On the Morrow of St. Martin 12	13	14	15	Saturday
In eight Days of St. Martin 18	19	20	21	Friday
From the Day of St. Martin in 15 Days 25	26	27	28	Friday

N. B. No Sitzings in Westminster-Hall on Ascension-day, Midsummer-day, and the second of February.

The Exchequer opens eight Days before any Term begins, except Trinity, before which it opens but four Days.

Note, That the first and last Days of every Term are the first and last Days of Appearance.

Common Notes for the Year 1777.

Golden Number	11	Shrove-Sunday	Feb. 9

Sundays after Epiphany	2	Sundays after Trinity	26
Septuagesima Sunday	Jan. 26	Advent-Sunday	Nov. 30

JANUARY hath XXXI Days.

A Jove Principium! from his Influence
 May Heaven distil peaceful Benevolence.
 May rough Bellona to Astræa bend,
 Sword Breaches, let the equal Scepter mend.
 Plenty and Peace, by Surfeit loath'd, no more
 Let us abuse, as we have heretofore.

But hold, my Muse, do not enrag'd fly
At those great Cheats, which thou seem'st to defery;
But rather silently keep in thy Station,
Cheats and Pickpockets are so much in Fashion;
There is a Sort of them beyond thy Reach,
That can protect themselves, while small-ones stretch.

JUPITER is a Morning Star till the 10th of January; from thence an Evening Star to the 27th of July; then a Morning Star to the Year's End.

Moore: FEBRUARY, 1777.

The 1st Day at 1 in the Morn. Saturn
 The 9th Day at 6 in Morning, Mercury
 The 11 Day at 8 in Morning, Venus
 The 18 Day at 1 in Aftern. Jupiter
 The 26 Day at 4 in Morning, Mars
 The 27 Day at 8 in Morning, Saturn } is with the Moon.

M	Sun	Sun	Moon's	Monthly Observations.	
D.	rises.	sets.	South.		
1	7 30	4 30	6 8	Post Tristia Læta.	
2	7 29	4 31	6 53	We have hitherto been strangely pre-	
3	7 27	4 33	7 41	served by the Divine Hand of Provi-	
4	7 26	4 34	8 37	dence from Plots and Conspiracies, and	
5	7 24	4 36	9 27	as much mischief as could be hatched	
6	7 22	4 38	10 23	in Hell itself; which may encourage	
7	7 20	4 40	11 20	us still to trust to the sole protection	
8	7 18	4 42	0 20	New Moon 8 Day at 5 in Morn.	
9	7 16	4 44	1 16	and Tuition of the Almighty. We	
10	7 14	4 46	2 10	have many remarkable Configurations	
11	7 12	4 48	3 3	this Month: Amongst the rest, that of	
12	7 11	4 49	3 55	the Square of Jupiter and Mars, and	
13	7 9	4 51	4 48	the Trine of the Sun and Saturn. And,	
14	7 7	4 53	5 40	First Quar. 14 Day at 8 at Night.	
15	7 5	4 55	6 33	I may say now, if ever serious Coun-	
16	7 3	4 57	7 27	cils and Consultations appeared in Eu-	
17	7 1	4 59	8 22	rope, this is the Time; and, we may	
18	6 59	5 1	9 17	assure ourselves, that there are very	
19	6 57	5 3	10 9	great Things in Agitation; and most	
20	6 55	5 5	10 58	Nations, as well as our own, are very	
21	6 53	5 7	11 45	willing to listen to the Accommodations	
22	6 52	5 8	Morn.	of Peace.	
23	6 50	5 10	0 31	Full Moon 23 Day at 9 in Morn.	
24	6 48	5 12	1 15	'Tis true, some of our Enemies seem	
25	6 46	5 14	1 57	friendly; yet others continue their Ran-	
26	6 44	5 16	2 38	cour and Spleen in plotting and dis-	
27	6 42	5 18	3 20	persing of malicious Pamphlets against	
28	6 40	5 20	4 3	the Government.	

Venus is Occidental and an Evening Star till the 1st of June; from thence she becomes Oriental, and is a Morning Star to the End of the Year.

MARCH hath XXXI Days.

Night's Terror now doth by Degrees decay.
 And flowing Minutes do increase the Day;
 Yet both dissatisfied appeal to Laws,
 And Sol, that glorious Judge, decides the Cause:
 Saturn at Venus casts an angry Ray,
 But Titan Frowns commands him to obey.

1	6	38	5	22	4	47	A superioribus inferiora reguntur.
2	6	36	5	24	5	34	Last Quar. 2d Day at 2 in After.
3	6	34	5	26	6	24	Many are the Configurations of this
4	6	32	5	28	7	16	Month; it comes in with a glorious
5	6	30	5	30	8	10	Trine of the Sun and Jove, who also
6	6	28	5	32	9	7	meet with a favourable Aspect from
7	6	26	5	34	10	4	Venus. Here is some eminent Person,
8	6	24	5	36	10	59	either Lawyer or Divine, near Prefer-
9	6	22	5	38	11	56	ment; and some notable Things under
10	6	20	5	40	0	54	New Moon 9 Day at 3 in Aftern.
11	6	18	5	42	1	49	Debate; for the Heavens seem to repre-
12	6	16	5	44	2	43	sent the Actions of Mankind in an
13	6	14	5	46	3	37	hopeful Way of Reconciliation. As
14	6	12	5	48	4	32	for private Disgusts and Animosities, let
15	6	10	5	50	5	28	the Persons concerned compose at Plea-
16	6	8	5	52	6	24	sure.
17	6	6	5	54	7	19	First Quar. 16 Day at 6 in Morn.
18	6	4	5	56	8	12	Great Application to Men in Power;
19	6	2	5	58	9	2	yet busy active Spirits create themselves
20	6	0	6	0	9	50	Trouble. And at this Juncture great
21	5	58	6	2	10	35	Things depending are managed with
22	5	56	6	4	11	19	much Secrecy.
23	5	54	6	6	Morn.		The Affairs of Great Britain conti-
24	5	52	6	8	6	2	nue in good Order. Great Consulta-
25	5	50	6	10	0	54	tion concerning Articles or the Peace
26	5	48	6	12	1	25	of the Countries beyond the Atlantick;
27	5	46	6	14	2	8	which will have a good Conclusion, if
28	5	44	6	16	2	51	our home-bred Disturbances do not re-
29	5	42	6	18	3	36	tard it; which, if they do, let them
30	5	40	6	20	4	24	call to mind the Fate of some of their
31	5	38	6	22	5	15	Fraternity.

A P R I L hath XXX Days.

As Troops appointed from all Parts prepare,
To march in order for some cruel War;
So do the Stars, by thwarting Motions, shew
A Storm at Hand, with Blood and Ruin too.
The Rays are fixt and furious, their Doom may
Strike at the Root of North America.

Wise Mariners provide against a Storm,
 By early Prudence they prevent their Harm.
 Great Men, and them great Wits, will act, you'll see,
 By crafty Stratagems prodigiously.
 I fear the Influence of some cruel Star;
 Let God keep Europe from an holy War.

Table of some principal fixed Stars, with the Time they Rise, South and Set, either before or after the Seven Stars; as also their Colour, Magnitude, and Meridian Altitude, by which they may be readily discovered.

Co- lour	Alt.	Mag	Names of the Stars.	Rise h. m.	South h. m.	Sets h. m.
♂	53	1	Aldebaran, or Bull's Eye	1a34	0a48	0b0
h 2	29	1	Left Foot of Orion	4 31	1 31	1 34
♂ 2	36	2	Middle * in Orion's Belt	4 13	1 51	0 35
♂ 2	45	1	Right Soulder of Orion	3 23	2 8	0 8
♀ ♂	21	1	Syrius, the great Dog	6 41	3 1	0 48
♂	43	2	Procyon the little Dog	5 33	3 53	2a 7
h 2	30	1	Heart of Hydra	8 39	5 41	2 44
h 2	51	1	Regulus, Lion's Heart	7 26	6 21	5 16
♂	54	1	The Lion's Tail, Denab	8 42	7 54	7 7
♀ ♂	28	1	Virgins Spike	12 46	9 38	6 36
♂ 2	58	1	Arcturus	10 47	10 30	10 12
♂	12	1	Antares, the Scorp. He.	17 36	12 39	7 42
h 2	46	2	Bright * of the Vulture	17 38	16 3	9b27
♂ 2	6	1	Fomelhaut	11 14	19 11	10 37
h 2	56	2	Head of Andromeda	10 42	10 19	2 56

THE brightest of the Seven Stars is of the third Magnitude, and hath 61 Degrees of Meridian Altitude, and in Colour participates of the D and M

The fixed Stars all rise, south, and set about four Minutes sooner every Night than they did the Night before; this considered, the exact Time of the Rising, Southing, and Setting for any intermediate Night, not herein noted, may be very easily deduced from these Tables, by Inspection only.

To know the Time of the Rising, Southing, and Setting of any Star in this Table, for any Day required, it is but considering how many Hours and Minutes that Star rises, souths, or sets, either before or after the Seven Stars on that Day, and you will have your Desire; observing that in this Table, *a* stands for *after* and *b* for *before*.

A Table shewing the Bearing, Distance, Longest Way, and Difference of Meridians of most of the principal Cities in the World, from the famous City of L O N D O N.

Of the ECLIPSES of the two great Luminaries for the Year 1777.

WITHIN the Circumference of this Year, there will be five Elipses of the Luminaries, three of the Sun, and two of the Moon, and they will happen in the following Order, as they were calculated and sent to me by my Astronomical Friend, Mr. HENRY ANDREWS, Teacher of the Mathematics, at Royston, in Herefordshire, with whom Youth are boarded, and made ready and fit for Business.

The first is a small and partial Eclipse of the Sun, upon Thursday the 9th of January, the middle of which happens at 57 Minutes past 4 in the Evening, but the Sun setting that Night nearly at 4 at London, therefore only Part can be seen in Great-Britain; the Eclipse begins at London, at 49 Minutes past 3 in the Afternoon, to the right Hand of the Sun's lower Limb, as appears by the following Type, which shews its Appearance at Sun setting. The second is a partial Eclipse of the Moon, upon Thursday the 23d of January, in the Evening, the Beginning of which will not be seen in England, the Moon being then under the Horizon, but near the Time that the Sun sets, the Moon will rise with near half of her Disk emerged in the Earth's Shadow.

The Time and Manner of its Appearance may be expected as follows :

The Type of the Sun's Eclipse at setting.

End of Eclipse.

LONDON.

Begin	2 47 17	End	5 36 3
Middle	4 11 40	App. T.	Digits 7° 7'
Moon rise	4 25 0		

The third is a solar Defect, and happens on Friday the 4th of July, at 21 Minutes past our Midnight, therefore invisible in these Parts, but it will be seen in new Iceland, Van-Dieman's Land, new Holland, &c. and in about 4 Degrees of South Latitude, and Longitude $173\frac{1}{2}$ Degrees East of London, the Eclipse will be total and central in the Meridian.

The fourth Eclipse is a small one of the Moon, and invisible, upon the 20th of July, the middle of this Eclipse with respect to London, happens 41 Minutes past Noon, it will be visible in new Iceland, Van Dieman's Land, new Holland, &c. the Kingdoms of Siam and China in the East-Indies, &c. the Defect is but 1 Digit and a Quarter.

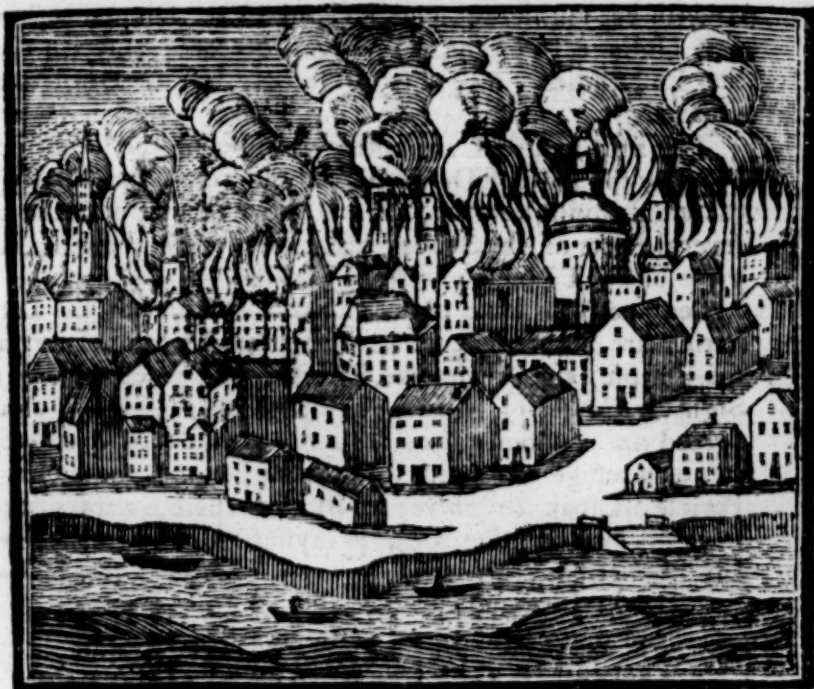

The fifth and last is another Eclipse of the Sun, upon Monday the 29th of December, at our 10 o'Clock at Night, therefore invisible to us. It will be a very large Eclipse in several Parts of the South Seas, namely, in about 150 Degrees of West Longitude from London.

Learned Men have observed, that Eclipses of the Luminaries are antecedent of great Mutations, and the greater the Eclipse, the greater the Effects; but whether they are Signs or Causes of Mundane Alterations, is not so clearly agreed on. Albeit, they certainly are known to precede, if not presage Prejudices, and that beyond the Power of Pericle's Cloak to prevent: But as these Eclipses are so small I shall neither trouble myself nor my Readers with any Predictions from them.

Bright Jove and Hermes now assist my Pains,
And put a Stop to all malicious Brains;
That spit their Venom on so pure an Art,
That they from that and it may soon depart.
But if not so, what then must we expect,
When on our Art and us Zoile does reflect?
But what need I consider such as those,
That every Thing but Wrong strive to oppose?
The Way that's left such to befriend my Fate,
Is still to prove more constant in their Hate;
And as for such who ne'er speak well of none,
Tho' Scorn's their due, I'll let those Fops alone:
And take a Turn in the Uranian Court,
Where Art and Nature frequently resort;

And

And there observe the Motion of each Sphere,
As in their Orbs and Order they appear.
Their Influences curious for to know,
How they incline us Mortals here below;
Where the Wars are over and where Peace doth last,
Of which few tell us that the worst is past.
Wars in some Places still seem coming on,
Rapine and Murder's neither fled nor gone;
What here is said is from th' Erratick Stars,
Hence see what follows, whether Peace or Wars.

You may remember a few Years ago I told you that a Gentleman presented me with a large Volume of Hieroglyphicks, and so I shall print one yearly; according to my Opinion, you see I have given you a City in Flames, with this memorable Notice, that Perjury, Rebellion, Treachery, &c. make Nations to mourn, as surely as they do Families or private Persons, and therefore I would advise all honest Men to be loyal to Government, and as for the other Sort let them take their Fate with the rebellious Americans. Here now follows one of Nostradamus's Prophecies, which is fulfilling now or near these Times:

Terre

*Terre Italique des Mons tremblera,
Lion et Coq non trop confederez,
En lieu et peur j'un j'autres saidera.
Seul Catulon et Celtes modererez.*

In English, thus :

*The Italian Land of the Mountains shall tremble,
The Lion and the Cock shall not agree very well together,
Shall for Fear help one another ;
The only Catulon and the Celtes shall be moderate.*

ANNO T A T I O N.

By the Lion he understandeth the English, because of their Arms, and by the Cock the French, called in Latin Gallus, which signifieth a Cock ; Catulon is the Spaniards, as if he should say Castilian ; the Celtes are the Dutch, of the Low Countries.

In the next Place I shall give the Reader an Account how the Cælestial Bodies are disposed in the ensuing Year, 1777, and what they may seem probably to signify unto this lower World. But in the first Place I shall treat of the Sun's Ingress into Capricornus, or the Cælestial Goat, which is as followeth : Upon Friday December the 20th, 16 Hours 33m. P. Meridian, or vulgarly on the 21st, at 33 Minutes past 4 in the Morning, 1776. This is called the Brumal or Winter Quarter, and continues that Space of Time that the Sun passes through Capricorn, Aquary and Pisces. In the Scheme 17 Deg. of Scorpio ascends, and 5 Deg. of MR is on the Med. Cæli, and the Moon is going from the Square of Venus, and hastening to the Sextile of U , and then to the Δ of δ and γ , and then to the Opposition of the Sun, so that a full Moon quickly follows the Sun's Ingress into Capricorn, and many are the favourable and propitious Configurations of the Planets at or about that Time to which I may add the Angles of the East and West are both fixed and ruled by Mars and Venus, and they in Δ to each other. Hence may be rationally conjectured to follow very serious and deliberate Consultations, with a settled and quiet Season, in general to continue for some Time. But anon, we shall hear of much Variety, and probably contrariety in the Judgments and Opinions of many knowing Men, even in the greatest Councils and Debates in several Parts of Europe, and the more especially towards the close of this Quarter, for the

Sun

Sun and Mars are in Square to each other, and the two Superiors were lately in two Squares, and in a few Months will make another Square, and all of them from \simeq and \propto , and Ψ being Equinoctial and Tropical Signs. From these Positions considered together, I do say there are now even at this Time, new Projects of Confusion in hand, and under Consideration, the Effects of which you will see in a few Months; it is now private and known but to a few, it is now upon the Arrival, and when it is wrought, filed, and polished, the World will receive the Present: Now to prove this Thing in Nature, I will give you four Instances in the last Century. In the Year 1618, there were three Squares of h and u , one from g and m , and two from II and x . Consider those bloody Wars that broke out immediately after it in Germany which wasted the Palatinate; the French King warred against his Subjects; the Bishop of Spalato plays his Tricks; the unhappy Business at Amboyna, with many other Things. Secondly, in the Years 1637 and 1638, there were three Squares of h and u , one from \simeq and Ψ , two from II , and m ; immediately after this there was tumultuous Meetings in Scotland, the Covenant and other Differences, and at last both Scotch and English take Arms, the Irish combine against the English, and many other Things which the Histories of those Times will declare. Thirdly, in 1657 and 1658, there were three Squares of h and u , from a and g . Cromwell the Usurper died; Sir George Booth rose in Cheshire; Commotions and Wars in the Isle of Funen; the King of Sweden died; General Monk began his March from Scotland, and at last altered the Government, and restored King Charles to his rightful Throne. Fourthly, there was one single Square of h and u in the Year 1677, in January, and in November following, another Square within a Degree. Now, were the Papists at Work with Might and Main to destroy the Religion of the Church of England, and contriving to murder the King. The French Army in Flanders; Mons besieged by the French, and relieved by the Prince of Orange, and the Kingdom of England in a general Ferment for a long Time, which by the Way observe, the Square was from II and x . Now, whether these Things be the Cause of these Accidents, or the Signs only, will be a Point disputable

putable among many, according as they are swayed in their Belief of Starry Influence: But my Opinion is, That the Stars are not the Signs of Accidents and Mutations, &c. of which they are not the Cause. But be it which it will of them, you see here are certainly Accidents and Mutations in the World, after such Rays as these; and therefore in my Opinion, the World will again see them shew a Specimen of their Power to convince Unbelievers, which is the Thing I endeavour to prove as well as predict in this Place; but I greatly fear if the Peace be not concluded between the North Americans and ourselves, before this Winter Quarter, (as at this present writing it is not) the present impending Influences will contribute but very little to that desirable Affair. — This Winter Quarter will be wet and sickly, attended with great Rains, or Snow, but not much Frost, as also, with Sickness or Mortality of some illustrious Persons of the first Magnitude, Rheums in the Eyes, Colds, Coughs, Shortness of Breath, Convulsions, Lethargies and such like Diseases as have their Original from Phlegm and Crudities.

Cold Winter now at last doth end the Year,
The Earth and Trees stript of their Summer Wear;
Cold and dark Air small Comfort to us yield,
Cold Rain, Frost and Snow doth now adorn the Field.

M A N ' s A G E .

And now our Heads are hid with Age's Snow,
And on our Cheeks such ample Furrows grow;
For Charon with his Boat to pass there's room,
To waft our Souls unto their longest Home.

OF the SPRING or VERNAL QUARTER.

THE Spring or Vernal Quarter (so called a Virendo, because every Thing then groweth green and flourisheth) commenceth when the Sun, the King of Stars, *Oculus Mundi*, the Eye of the World, *Fons lucis*, the Fountain of Light hath made his Revolution through the Ecliptic Ring, or the twelve Cælestial Signs of the Zodiac, and beginneth his Journey again at the first Scruple of Aries, and maketh the Days and Nights of equal Length. This Vernal Equinox happeneth this Year on Thursday the 20th of March, at 19 Min. past 6 in the Morning, at which

and ☉ goes to the 8 of Mars from the Ascendent and 7th. ☿ being Retrograde they both apply, and will I believe, bear the principal Sway in the Affairs of this Quarter, and perhaps of the whole Year also. I remember Messahala tells us a great many fine Stories about chusing the Lord of the Year; now by his Doctrine the ☉ and ☿ are Lords of the Year, and as I said before, are going to an Opposition, and the ☉ applying to a Square of ♃. These Things considered, I am of Opinion that we shall hear of fresh Ruptures, Inroads made by Armies to spoil and destroy, kill and take Captives; but I do not think this Position shews Battles and Engagements. *Et cum Mars fuerit Retrogradus, erit bellum cum Latronibus, qui non quiescunt uno loco, et non accedunt ad bellum.* But these Positions will also most certainly prepare for Actions of War towards the West and South-West too. I fear some Disorder in the North Part of Italy, and with it a Disease in and about those Countries and

and the Parts more Eastward, even beyond the Adriatick Sea; and this attended with a Division in their Councils, and Disorders in their Governments both Sacred and Civil.

The Figure of the Vernal Ingress must be allowed to be violent, as well as that of the Brumal, and it is not to be doubted but there will be a kind of Equality in their Effects too; and as δ and μ and the \odot are in Cardinal Signs in both, so the Effects of them will be spent in Things of great Importance in the Affairs of Princes, States, and Kingdoms, and that there will be a kind of Violence attend those Actions and Affairs because they are angular, and μ and δ has North Latitude. Yet a little after the Ingress δ applying to the Trine of μ shews some Endeavours used to prevent the Mischiefs that are feared and suspected, and does also promise Advantage to the Common People and a fruitful Year, but I think the Rays of δ to \odot and μ will cause a backward Spring, such as was in the Year 1751, or something like it; and also produce more Thunder, and earlier than it has appeared for some Years past, and particularly about the middle of April. I may also say it will produce more Variety of Weather than usual, particularly Frost, Wind, and Rain, in April and May, and also some slight Disease attended with a Fever may appear about London, and some other Parts of England, especially the South Parts of it. In a Word, the two Ingresses of γ and ν are very angry Ones, I pray God to divert their Effects.

But yet let me give another Paragraph and I have done. The Holy Scripture awards Obedience preferable to Sacrifice; if Men be willing and obedient, they shall enjoy the Good of the Land, but if they will be obstinate and disobedient, the evil Effects mentioned will fall to their Share. And though Jupiter were never so powerful in the second Angle, they cannot (if rebellious) have any Title to his bountiful Effects. Starry Influences, like God's gracious Promises, are conditional, and it is an allowed Motto, *Agunt, non legunt*. Though the Stars may entail Good upon us, yet our Disobedience to legal, just, and good Government, may cut off the Settlement, and leave us destitute of all the Comforts appending to Life, which brings me to consider the

S U M M E R

SUMMER QUARTER.

THE Summer Quarter begins June the 21st, 32' past 4 in the Morning, at which Time 6 Degrees of π culminates, and 10 Degrees of \odot ascends the Eastern Horizon, the \odot and Mercury are just risen into the 12th, and all the rest of the Planets are under the Earth, and δ is here also in Square to the \odot , so that δ you see afflicts the \odot in three successive Ingresses. And just before the Ingress of the \odot into \odot , γ and μ make their third and last Square, so that we may look on this Scheme to comprize the Rays, and something of the Effects of both, considered with the Full and New Moon, pre-ventional and post-ventional, for the better to judge the Effects; which seems to portend popular Noises and Clamours to be spread abroad by sundry pretended Zealots, whence commonly issues Murmurings, Suspensions, Jealousies, Plottings, Grudgings, with malicious and fraudulent Actions, some whereof may probably be broached upon Account of pretended Zeal, Devotion, and Piety: But true Piety or Devotion to Religion is never contentious, obstinate, envious, rebellious or disturbant to Magistrates, the Publick Peace, or their Neighbours. But on the contrary, exercises itself in Acts of Love, Charity, Friendship, brotherly Kindness, and to do as it would be done unto, &c. It is not Zeal to God or Religion, but wilful Obstinacy, that makes Men to oppose Authority, or disturb the publick Settlement. It is a strange Falacy in Religion (says a reverend Divine of our own Nation) to dishonour (or oppose) the King, and to make that a Proof that he fears God: God is for Order and Unity, it is Satan that foments Disorder and Division, and the established Law is a just Touchstone to distinguish between them.

My Room being so narrow, prevents my enlarging according to the Merits of my Scheme, so that i am forced only to touch upon Things superficially, as any Man but meanly skilled in this Art, may plainly discover or perceive.

Of the AUTUMNAL QUARTER.

THE Autumnal Quarter begins September the 22^d, at 3 Minutes past 6 at Night, at which Time one Deg. of

of Capricorn culminates on the Medium Cœli, and 2 Deg. of Aries ascends on the Eastermost Angle. It is a peaceable Figure and Position, nor is there any Thing remarkable in the Scheme, besides the ☉ in the 7th just setting, and ♄, ♀ and ♂ are in 7th and 8th in the descending Part of Heaven. I cannot see any Thing worth taking Notice of more than is usual in other Years, except some little Debates and Controversies among the Servants of Princes, Envoys, and Agents Ambassadors, about Affairs relating to their own and their Masters Business, but as for any Thing relating to publick Quarrels, Ruptures or Wars, here are no Rays that will promote Things of that Nature, but on the Reverse for the Fortunes are conjoined in ♄, in Δ to Aries, England's Ascendant, and the Moon is going from the 8 of Mars to the * of them both, which shews that the malecontented Tribe, the Disturbers of Government, are tired of their Intrigues, wearied with their Transactions, and seeking for Shelter under that Government which they have so wickedly abused. Princes and Magistrates may design us Good, and doubtless will too. It is their Interest, as well as Honour, to have their Subjects easy, and many leading Men of the Commonality will endeavour to improve such Favours and Blessings with Duty and Gratitude. It is for their own Advantage at present, and for their Posterity after them. For what is a Prince without a People? or a People without a Prince? The one hath no steady or tranquil Dominion (the only Blessing that makes a Diadem desirable) the other hath no Order, Ease, or Propriety: And so I shall make this Year's Task conclude with the Words of St. Paul, Rom. xiii. 1, 2. *Let every Soul be subject to the higher Powers, for there is no Power but of God, and the Powers that be are ordained of God. Whosoever therefore resisteth the Power, resisteth the Ordinance of God: And they that resist shall receive to themselves Condemnation.*
